

Squirrel & Raccoon Baffles 101

Many people love the look and functionality of a wooden bird feeder but don't like squirrels on their bird feeders. Squirrel and raccoon baffles are the best solution and can be effective if they are the correct size and placed in the correct position. Here are some tips to determine if a squirrel baffle is right for you.

Styles and options

Cone style

Squirrel Baffle must be a total of 11" from centre to bottom.

Cone style-decorative

Cone style for 4x4

Dome style

Mandarin style

Raccoon baffle

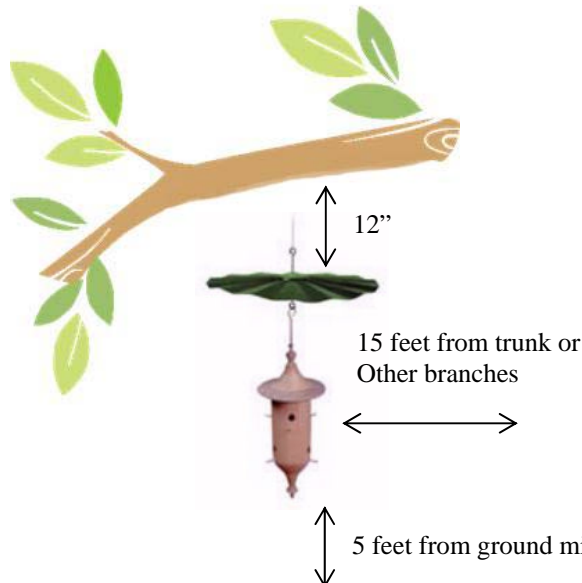

Raccoon Baffle must be a total of 24" from top to bottom.

Squirrel Baffle must be a total of 11" from centre to bottom

Squirrel Baffle must have a 6" diameter

- Baffle is 12" or more lower than the branch
- 5' away from the tree trunk.
- Bottom of the feeder must be at least 5' from the ground.
